

Applications Engineer

Applications Engineer • WASHINGTON, MO

Description

The premier welding robot integrator in the Midwest is seeking an Applications Engineer to support growth in the sales department. The ideal candidate has an engineering degree (ME, EE, MfgE preferred), has mechanical design experience in CAD (Autocad Inventor experience is a plus), has experience interacting with a multi-disciplinary team, has robotic tooling design/build experience and enjoys a work environment that is challenging and rewarding. As an employee owned company we seek candidates that have an entrepreneurial spirit and "can do" attitude. If this is you, please send your resume to careers@meltonmachine.com.
